Jane is a research-based designer for performances. She grapples with the ephemerality of objects and spaces, preserving their ever-changing meanings in different theatrical settings. She mainly designs set and digital media for theater while creating individual video and interactive installation projects.

She is a foreign, traveling artist seeking for sustainable design approaches. Her works have been displayed and performed in China, US, UK, and Germany. At the end of the day, art is never transparent. It is opaque. And so we are.

Jane is the co-founder and creative producer of in-version ensemble.
